Welzh Werkzeug® The Apex of Tool Innovation

- Since 2011 Welzh Werkzeug has been a symbol of tool innovation and quality. Our overall aim is to offer the most innovative and comprehensive automotive products at the very best value for money for the benefit of our customers.
- State of the art software and careful planning enable us to handle large amounts of stock flow across the whole mainland Europe, allowing for a 99.8% fulfillment of all orders. This efficient system enables a 24-hour pick and dispatch process for next day deliveries on the majority of all orders.

Made in the UK

- Strengthening our commitment to the UK market with our increase in local manufacturing has allowed our range of heavy-duty load-bearing tools to be developed and tested to a degree not previously possible.
- The combination of high-quality British materials and no international shipping or import costs allows us to provide superior quality products at a fraction of the cost of our competitors, ensuring our customers receive the best products at the best price. This range of tools includes the HubMate™, StrutMate™, LeverMate™, Inner-Driveshaft Extractor Fork, and more.

-  Alicates para Lineas de Combustible Cabezal Flexible
-  Alicates de Linha de Combustível Cabeça Flexível
-  Kraftstoffleitungszange Flexibler Kopf
-  Pince de Ligne de Carburant Tête Flexible

Specially designed fuel line pliers with a unique 270° flexi-head to allow access to restricted areas not possible to reach using conventional tools.
Allows the professional unlocking of quick couplings on fuel lines, required when changing the fuel filter or repairing the fuel system.

Modern quick couplings on fuel lines have very small unlocking tabs which cannot be operated with a conventional unlocking pliers because the pliers fingers are simply too large.
The special design of our pliers fingers, which can also be swivelled up to 90°, enable damage-free unlocking even on difficult-to-access areas.

Suitable for all metric & SAE connectors on Fuel, Air Con, Brake & Oil Lines.
Universally suitable for quick couplings on fuel lines e.g. for VW-Audi, Seat, Skoda, Mercedes, BMW, Renault, Peugeot, Opel, Chrysler, Fiat etc.

Damage Free Restoration
The removal of the NOX sensor usually causes damage to the threads as a normal tap is too long, and it might be placed at an angle that provides the new sensor with an incorrect mounting position within the exhaust. The damage can also be caused by the high variation in temperature and carbonization.

The WELZH kit allows for damage free restoration of the NOX sensor hole thread, with the alignment guides ensuring it is at the correct angle.

Extra Short
Can be used with a socket or ratchet for hard to reach areas.
Time and Money Saver
No need for a new exhaust system.

Universal
For diesel particulate filter, any exhaust sensors, and those in a catalytic convertor.

These plugs eliminate the problem of damaged oil sumps being tapped as they replace the original plug without any other intervention.
 The thread pitch is the same as the original one, but with a larger thread diameter.

Using these drain plugs does not require the thread to be restored, they should be directly mounted.
 Each plug includes a second plug.
 Once mounted, the first plug is let on the oil tank while the other plug will be used for the next draining.

The all new Viper-Step by WELZH drill bit design cuts 55% quicker and excels at sheet metal and toughend metal like broken fasteners. Viper-Step stays sharp and pointy unlike traditional drill bits. The multi stepped tip portrays a step drill allowing for top precision holes through metal. The Viper-Step design also prevents slipping on curved surfaces. Viper-Step technology eliminates the need to drill starter pilot holes. Viper-Step has a life expectancy 80% longer than traditional drill bits.

Wheel Hanger Alignment Set

Especially useful when replacing the brake discs. The wheel hanger alignment pins ensure that the holes in the new disc are perfectly aligned with those in the wheel hub.

For stabilising brake discs, preventing brake callipers from wobbling.

Includes

Most common thread and pitch sizes as well as wheel stud version for hubs with wheel studs (particularly useful for 4x4 wheels).

Two pieces for each size. Helpful when doing tire rotation.

Go-Through system is suitable for extra long fixings and rods, as it removes the 13mm Hex Drive: depth limit of standard sockets.

22mm Hex Drive:

- 72-Tooth Go-Through ratchet, 22mm inner Hex.
- Go-Through extension bar, 75mm.
- 7x Gear Lock Sockets, approx. 40mm long.
- Sizes: 19, 20, 21, 22, 23, 24, 25mm.
- Adapter: 22mm outer Hex to 1/2" outer square, for ratchet.
- Adapter: 22mm inner Hex to 1/2" inner square, for extension bar.

19mm Hex Drive:

- 72-Tooth Go-Through ratchet, 19mm inner Hex.
- Go-Through extension bar, 75mm.
- 11x Gear Lock Sockets, 30mm long.
- Sizes: 8, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19mm.
- Adapter: 19mm outer Hex to 3/8" outer square, for ratchet.
- Adapter: 19mm inner Hex to 3/8" inner square, for extension bar.

- 72-Tooth Go-Through ratchet, 13mm inner Hex.
- Go-Through extension bar, 75mm.
- 11x Gear Lock Sockets, 25mm long.
- Sizes: 4.5, 5, 5.5, 6, 7, 8, 9, 10, 11, 12, 13mm.
- Adapter: 13mm outer Hex to 1/4" outer square, for extension bar.
- Adapter: 13mm inner Hex to 1/4" inner square, for ratchet.
- Adapter: 13mm outer Hex to 1/4" inner Hex, allows the ratchet be used as a standard 1/4" ratchet.

- 1/4" Drive Bits:
- Slot bits: 4 & 5mm.
- T-Star bits: T10, T15, T20.
- Cross slot bits: PH1 & PH2.
- Inner Hex bits: 4, 5 & 6mm.

Specialist tool designed to be used when removing the top of Macpherson strut mounts. Which are commonly found on Audi, SEAT, Skoda and VW vehicles.

The fixtures are found in a confined area which makes access awkward via traditional methods. Although in a confined area the nuts are prone to corrosion and damage which means replacement and servicing is often needed.

Our product has been uniquely designed to access the strut mount with minimal effort due to the flexible design.

The factory OEM nuts can either be 6 or 8 point, due to the dual sided socket 4130-WW can accommodate both.

- Douille flexible pour boulons de montage de suspension sur le groupe VAG de 14 mm

Specialist tool designed to be used when removing the top of Macpherson strut mounts. Which are commonly found on Audi, SEAT, Skoda and VW vehicles.

The fixtures are found in a confined area which makes access awkward via traditional methods. Although in a confined area the nuts are prone to corrosion and damage which means replacement and servicing is often needed.

Our product has been uniquely designed to access the strut mount with minimal effort due to the flexible design.

The factory OEM nuts can either be 6 or 8 point, due to the dual sided socket 4130-WW can accommodate both.

3/8" drive - should be used with an extension bar (80 mm).

 Solenoid Replacement Process: Late model VW group vehicles employ electronic solenoids to activate the brakes through the caliper.
 Should any solenoid issues arise, replacement becomes necessary, and a 3/8D 5 point spline socket is essential for retracting the caliper and aligning it to accommodate the new solenoid.

Compatible Models: This maintenance procedure is specifically designed for certain models, including the Volkswagen Golf Mk VIII, which are equipped with brake calipers featuring electronic EPB solenoids.

Adherence to OEM Instructions: To ensure proper and effective utilization of the socket (Equivalent to OEM T10621), it is of utmost importance to follow the detailed instructions provided by the Original Equipment Manufacturer (OEM)."

Specially Designed
 For cutting and rethreading the spark plug.
 Almost 90 % of the heat from the spark plug is released through the seat and thread area. When contamination builds up on the seat and threads it can drastically effect spark plug performance.

Restoration and Removal
 The spark plug seat and thread conditioning tool restores the seat area and removes a major amount of contaminants on the spark plug port threads at the same time.

One Step Operation
 This rugged but simple design allows for two important maintenance functions to be performed in a one step operation.

-  Ratchet Mate™; 3/8"dr, Longueur de 230 / 280mm, Ensemble de 2 pièces

Special Pull Back Design:

This unique design means the ratchet is far more efficient than a conventional ratchet, spanner or other wrench having enormous benefits in tight spaces & when loose or awkward nuts & bolts are found.

Two Finger Pull Mechanism:

Simply hold the ratchet as usual and place your two fingers over & under the sides of the ratchet. Pulling these sides up with your fingers will allow the ratchet to turn the socket/bolt whilst keeping the ratchet stable.

Firm & Secure Use:

No need to swing the ratchet from side to side, simply pull up the sides to ratchet easily. Makes this a compact and reliable tool.

Other Specifications:

- 48 Teeth Push-Through Square Drive Ratchet Mechanism.
- Patented Pull-Back Drive Action.
- Cr-Mo Drive Gear and Cr-V Body.
- Two-finger operation

Welzh Air Co Machine Fully Automatic

Máquina totalmente automática de Welzh Air Co.

Máquina totalmente automática da Welzh Air Co.

Vollautomatische Welzh Air Co Maschine.

Machine entièrement automatique de Welzh Air Co.

Welzh Fully Automatic Air Con Filling Machine patented design innovatively designed for use on both R-1234yf or R-134a type refrigerant.

(Only one refrigerant can be permanently used once the chosen refrigerant has been selected)

Welzh Air 291220-WW has a built-in vehicle data base. The programme can automatically match the filling volume according to the manufacturer's model. This can also provide information such as the type and filling volume of the refrigerant oil.

Main Functions:

Recovery: Purifies and recovers refrigerant to the equipment tank

Vacuum: Clears air and moisture from the AC system

Charge: Charges the refrigerant from the equipment gas cylinder into the automotive AC system

AC system

Auto-mode: Carries out the functions selected in an automatic procedure

Features:

Refrigerant recovery and purification, drain used refrigerant oil, scheduled vacuuming,

adjustable oil filling, adjustable refrigerant filling, and fully automatic operation

Oil and air can be automatically separated and collected through separate tubes to

ensure separate recovery of steam and liquid

Large-size LCD colour display screen. Allows users to complete the service work

through the touch panel, and support long-distance real-time monitoring

Equipped with a built in compressor which can realize accurate and continuous refrigerant recovery as well as effectively control the freezing phenomenon in the drying filter

Equipped with a high-precision electronic scale, which can prevent overfilling.

Accurately measures the volume of refrigerant

Suitable for all manufacturers, including Hybrid and Electric vehicles

Specifications

- Input power: AC220V±10%~50/60Hz or AC110V±10%~60Hz

- Compressor power: 3/8HP

- Average gas state refrigerant recovery speed (through charge/suction port): 0.25Kg/ min.

- Hand valves free

- Recovery rate: 96%

- Vacuum pump capacity: 60L/min, non-sparkle

- Accuracy of gas cylinder load cell: ±10g

UFI Kraftstofffilter-Abdeckung Installationshebel

Lever d'installation de couvercle de filtre à carburant UFI

The unique feature of this tool is to allow re-assembly of the filter housing without bending or damaging the gasket face when removing the filter.

Not using this tool can lead to further more costly problems if the filter is damaged while being replaced.

Most commonly found on VAG Group vehicles with 2.0l TDI common rail engines.

The huge savings in cost can allow this tool to pay for it's self in just one use.

Subframe Locating Pins For VAG Group

-  Pasadores de localización de subchasis para el Grupo VAG
-  Pinos de localização do subquadro para o Grupo VAG
-  Rahmenunterstützungsnadeln für die VAG-Gruppe
-  Broches de localisation de sous-châssis pour le Groupe VAG

Primary Used on a variety of VA Model Vehicles Including Volkswagen Scirocco 09-. EOS (06), Golf (09), Golf Plus (05), Jetta (04-06), Polo (02), Fox (06), Passat (06), Passat CL (09) and Audi A3 (04), TT (07) and A4 (01).

On some vehicles in the Volkswagen Audi Group the sub-frame needs to be removed to service the suspension bushes, when removing the clutch, changing the engine, servicing the wheels, steering, stabilizer bar or control arms.

These pins are screwed into the sub-frame and used to guide it back into place once the task is complete. Care should be taken to bolt back diagonally and to the manufacturer's recommended torque.

Two sizes are available: The first an M12 can be fitted to Volkswagen Scirocco (09), EOS (06), Golf (09), Golf Plus (05), Jetta (4-06) Polo (02), Fox (06), Passat (06), Passat CL (09), Audi A3 (04), TT (07) and A4 (01) - OEM T10096 (Sub-frame Locating Pins - Volkswagen and Audi Group (Part No 4722)).

The second size an M14 is primarily used for the new Volkswagen Crafter - OEM T10227 (Part No 4840).

Specially Designed
The Welzh Injector adaptor is specially designed to be used with Welzh Vibration Mate (4589-WW) for removing Ford EcoBlue diesel injectors in one piece.
Convenient

Previously, the EcoBlue injectors could only be removed if the fuel return connection and Piezo head were removed by breaking them off rendering the injector unusable. This kit allows these injectors to be pulled out without needing to break the injector first.

It extracts diesel injectors in one piece allowing them to be refitted.

Applications Include
Ford Edge, Focus, Galaxy, S-Max (from 2018) Kuga, Mondeo, Ranger (from 2019)
Tourneo, Transit (from 2016), and 2.0L EcoBlue diesel engines.

Welzh Injector Removal tool
For use on the late model 1.0L and 1.4L direct injection petrol engines used across the Vauxhall, Opel and some MG ranges. These small injectors are centrally mounted low between the cam shafts and in line with the spark plugs. Some force is required to remove the injectors. The most effective way to remove these is to use the adaptor set with the WELZH Pneumatic Injector Remover (4590-WW, 4589-WW). The Injector Removal Tool (4998-WW) adaptor set has been specifically design to bolt directly to the fuel rail mounting on the Petrol Injector 5/8" UNF slide hammer adaptor.

Applications include:
MG ZS (2017 - 2021), Vauxhall/Opel Adam (2016 - 2020), Astra K (2015 - 2019), Corsa E (2015 - 2020) and Mokka X (2018 - 2020).
Engine code applications include: 1.0L LE1/B10, 1.4L LDD/D14XEL, D14XER, LE2/D14XFL, D14XFT, LUJ/D14NE, D14NEH, D14NEJ, LUJ/D14NEL and 1.5L 15E4E.

Designed to bolt directly to the 2 bolt fixing on the fuel pipe mounting plate.
Equivalent to OEM TEN00140.

-  Ensemble de régulateurs fictifs à rail commun

Used alongside Welzh Diesel High Pressure Pump Test Kit (4606-WW) to diagnose regulator and pump issues.

Diagnosis Process

Identify Weak Pump Pressure: Observe low pump pressure.

Regulator Check: Remove regulator from the system.

Bypass and Seal: Select appropriate dummy plug to seal the port.

Pressure Observation: Monitor pressure response.

Results Interpretation

If pressure returns to normal: Regulator likely causing pressure loss.

If pressure remains low: Pump may be defective.

Endorsed testing method by high-pressure pump manufacturers.

Includes 8 diverse dummy plugs for sealing regulator ports.

Versatile Application

Specifically designed for efficient and safe handling of electric vehicle batteries in workshops and service centers.

With a wide working range from 650mm to 1840mm, it accommodates a variety of tasks and applications.

Robust Safety Measures

Equipped with essential safety devices and has undergone thorough safety and quality control tests to ensure the well-being of operators.

A built-in stabilization system with leveler screws provides added stability when the platform is used as a stationary work surface.

Efficient Operation

With a load capacity of 1200kg and a distributed load design, the lifting table is well-suited for handling heavy vehicle components.

The user-friendly push-button control system, smooth lifting action, and easy maneuverability make the lifting table simple to operate, reducing operator fatigue and enhancing overall productivity.

-  Scie pneumatique pour carrosserie; Faibles vibrations

Durable Aluminum Construction
The reciprocating saw features a robust aluminum body that provides long-lasting durability and reliable performance in demanding cutting applications

Enhanced User Comfort
Designed with user comfort in mind, this tool incorporates an advanced vibration reduction system that minimizes fatigue during extended use, allowing for more efficient and comfortable operation

Powerful and Versatile Cutting
With an impressive 9000 strokes per minute, this saw delivers powerful cutting performance for tackling various materials efficiently. It also offers the flexibility to swap out the saw blade for rasps, enabling coarse shaping of wood and other materials. The safety trigger prevents accidental starts, while the muffled 360° rear exhaust ensures quieter operation.

Automotive Diagnostic Tool Cart
High-quality materials, advanced technology, and a simple layered design. A multi-purpose diagnostic tool cart that combines the laptop computer storage layer, the programming power storage layer, the spare parts storage layer and the battery storage layer, which changes the singleness of the traditional tool cart and creates a comfortable, clean and orderly working environment for you.

Robust structure

Sturdy and durable. It is forged with heavy-duty steel, making it durable and not easy to deform. The maximum load-bearing capacity can reach 300kg. Powder-coated for excellent rust and corrosion resistance and easy to clean.

360-degree swivel casters

Made of natural rubber which is soft in texture and has a good mute effect, reducing the friction on the ground. Four flexible and secure casters (2 lockable) ensure easy and stable movement and help reduce physical effort when moving and also keeping it in a fixed position.

Practical

Hooks make it easy to organize your tools without losing them.

Complete Hydraulic Solution

The Hydraulic Mate Set is the ultimate companion for your Universal Press & Pull Sleeve Sets (67305-WW and 78093-WW), offering a complete hydraulic solution for your pressing and pulling needs. With the ability to supply hydraulic fluid pressure to selected tools, this set empowers you with the force required to tackle challenging tasks effortlessly.

Control and Power

The 4884-WW Air Hydraulic Pump serves as the powerhouse, providing the necessary hydraulic pressure to operate the set effectively.

The 4886-WW Hydraulic Mate Cylinder enables controlled movements and precise application of force, while the 4883-WW Hydraulic Mate Spindle and Nut securely fasten and facilitate the pressing or pulling actions.

The 4885-WW Hydraulic Mate Hose connects the pump and cylinder, ensuring the smooth transmission of hydraulic fluid.

Protecting and Empowering

In addition to the impressive capabilities of the Hydraulic Mate Set, it also comes with a protective storage case to keep your tools organized and safeguarded.

The sturdy and durable case ensures that your equipment remains in optimal condition, ready for use whenever you need it.
